

# Solution 1 – Descriptive Statistics

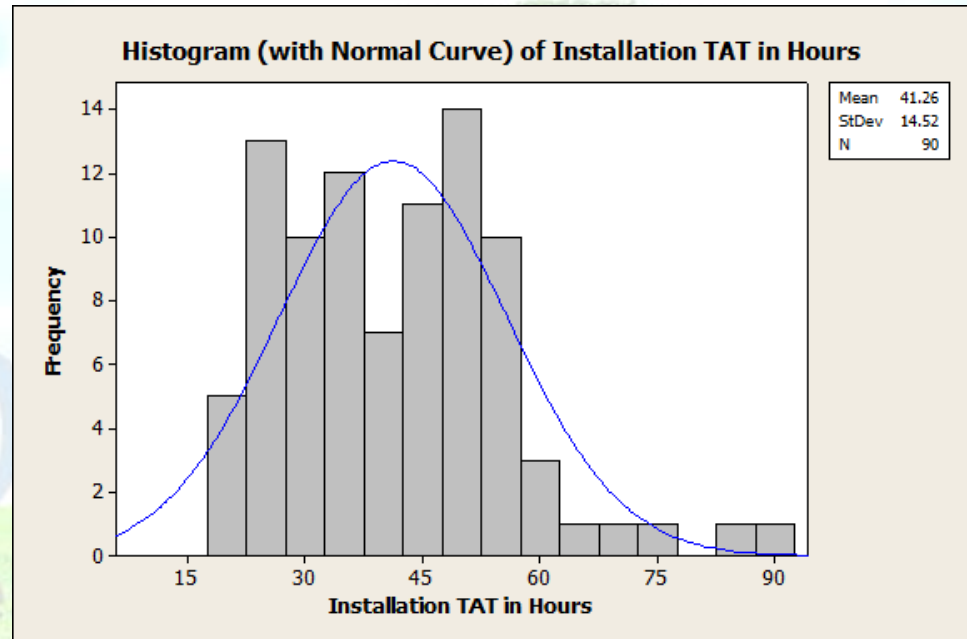

## Descriptive Statistics: Installation TAT in Hours

Variable	N	N*	Mean	SE Mean	StDev	Minimum	Q1	Median
Installation TAT in Hour	90	0	41.26	1.53	14.52	18.00	28.00	40.50

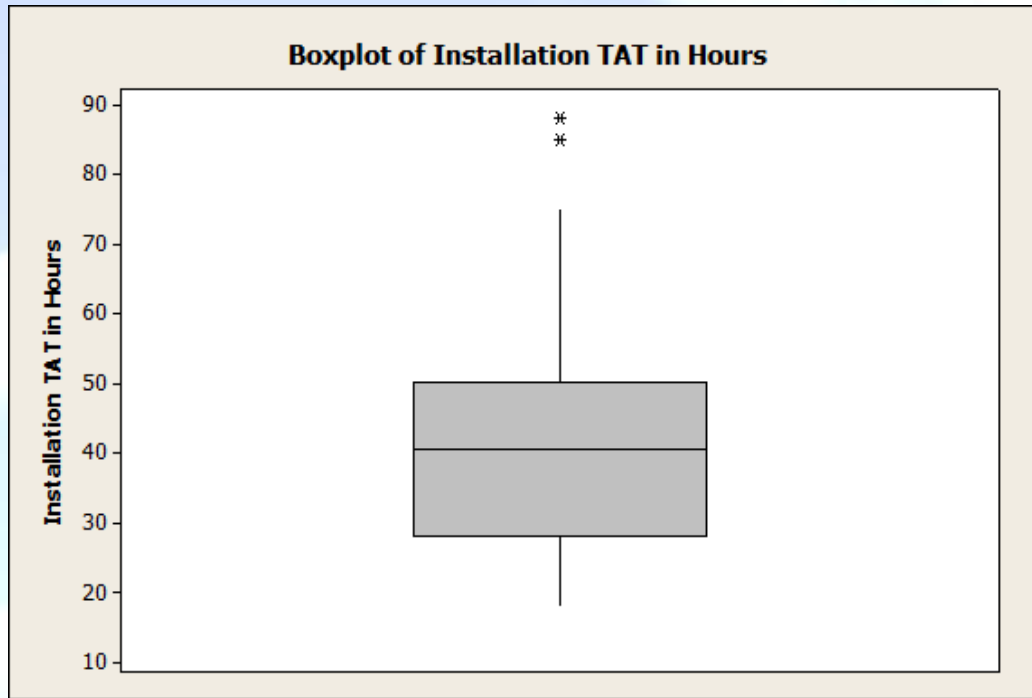

Variable	Q3	Maximum	Mode	N for Mode
Installation TAT in Hour	50.25	88.00	48	6

## Interpretation of Results:

- 👍 The Mean, Median, Mode, & Standard Deviation together with the minimum and maximum are given in the results
- 👍 The graph represents the graphical output

# Solution 1 – Box-Plot

## Interpretation of Results:

- 👉 Data appears to contain 'outliers' only on one side - top
- 👉 Data is left skewed as top 'whisker' is longer than bottom 'whisker'
- 👉 Special cause of variation & reason for outliers to be investigated, by reviewing fish-bone diagram
